

The Fiber Laser Training Notice

Hosts: Chinese Laser Press (CLP), Messe München International

Co-host: Institute of Software Chinese Academy of Sciences

Date: March 15, 2018

Location: Shanghai New International Expo Center W2-M2 Conference Room

Training Contents:

1. Fiber Laser Training:

Training Presenter:

Pu Wang, Professor, Beijing University of Technology

Main Contents:

- The development and application of fiber lasers.
- The technical bottlenecks in the development of fiber lasers.
- The application prospect and development trend of fiber lasers.

2. Fiber Laser Simulation Software SeeFiberLaser Training:

Training Presenter:

Xiaolin Wang, Associate Researcher, National University of Defense Technology

Operation Demonstration On-site:

Chen Shi, Assistant Researcher, National Defense University of Science and Technology

Lei Duan, Senior Engineer, Institute of Software Chinese Academy of Sciences

Main Content:

Our training will primarily focus on features, modules, methods of operation and case presentation of fiber Laser Toolkit - SFTool and fiber laser simulation software - SeeFiberLaser.

Join the Training:

Note: Free training, pre-registration required. Admission by business card only (First 80).

Pre-registration: Email "Name + Telephone Number + Unit" to zhouxiaoying@siom.ac.cn
